PUBLIC DECLARATION

The Zero Carbon Project is part of Schneider Electric's external commitment on sustainability. The progress and process are being reported in the group's annual sustainability report. All the data & process are audited by an independent external agency. As we don't do any data audit for our TZCP suppliers, we request them to declare their emission figures, progress, and target on public domain.

Below is the information we would need you to provide through a public domain (company website/annual report/sustainability report/ESG report/CDP climate survey etc.)

It is not necessary for you to follow only below format; you can follow any better format (example: you can mention about the actions you have taken or are planning to take) but the content should be same or more.

	Base Year – 2021	Most recent Year - 2023
Scope 1 emission in Tons	Not applicable	Not applicable
Scope 2 emission in Tons	177	127

Our CO2e intensity (per unit of sales) was reduced by **51%** from **2021** to **2023**

Our target is to reduce CO2e intensity (per unit of sales) by **55%** by **2025**.
